Application/Control Number: 10/626,639

Art Unit: 3661

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a steering control system for a vehicle determining a steering angle sent to a steering shaft according to an operation angle of a handle shaft and a driving stage of the vehicle, and rotating the steering shaft by an actuator to create the steering angle comprising a steering controller receiving a pattern output of the identified angle phase from the angle detector, wherein the steering controller identifies a rotational direction of the angle detector based on the pattern output, performs a sampling of the pattern output at a predetermined interval, identifies an order of combination order of the identified pattern of the angle phase in a first sampling and a second sampling following to the first sampling, and determines a pattern exchange number with the rotational direction, the steering controller adds a number corresponding to the pattern exchange number to a counting number when the rotational direction is plus and decrease a number corresponding to the pattern exchange number from the counting number when the rotational direction is minus, and the steering controller has an angular position counter of steering shaft registers the angular position of steering shaft by the counting number. These limitations are neither taught nor obvious by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Application/Control Number: 10/626,639

Art Unit: 3661

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US Patent No. 4,880,072, 4,658,927, 6,052,633,6,016,881, 20030114970.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gertrude Arthur-Jeanglaude whose telephone number is (703) 308-7564. The examiner can normally be reached on Monday-Friday from 8:30 a.m. to 6:00 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Black can be reached on (703) 305-8233. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
